

## MATERIALS & FINISHES

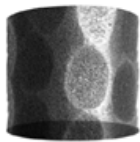

BrandedHandles.com hardware comes in a variety of different base materials, including solid and tubular metals, exotic hard woods and cast acrylic to ensure that your client's hardware compliments his or her lifestyle. In addition our range of pulls can be specified for appearance (colors, sheens, antiquing) as well as function (Heavy, medium, light usage).

Due to the relative inconsistencies of various display monitors and/or printers, the finish colors you see may not be an accurate representation of the actual finish. The chart is only intended to act as a guide. If you would like to see a sample of the finishes shown on the chart please contact customer service at [Sales@BrandedHandles.com](mailto:Sales@BrandedHandles.com).
